

# Idera SharePoint enterprise manager™

Fast, effective, SharePoint administration and security management

Idera SharePoint enterprise manager is a complete and powerful web-based solution for all SharePoint administration and permissions management needs. SharePoint enterprise manager helps you save substantial time and money by effectively eliminating difficult and repetitive daily tasks, while enabling instant access to critical administration and security information not available with native tools. Take control of your SharePoint farm now with SharePoint enterprise manager.

## WHY IDERA SHAREPOINT ENTERPRISE MANAGER?

Idera SharePoint enterprise manager simplifies SharePoint's administrative complexity with an easy to use and powerful product solution. Take complete charge of account, site, list, and item administration in SharePoint using real-time environment analytics and security reporting. With Idera SharePoint enterprise manager you can effectively administer, manage, and maintain your SharePoint environment's governance and compliance measures.

## PRODUCT HIGHLIGHTS

- Accurate enterprise administration and permissions management
- SharePoint security management and reporting at the account, site, list and item levels
- Comprehensive, real-time environment reporting and analysis
- Accurate and effective maintenance of governance and compliance standards
- Extensive and safe delegation of administrative powers

## KEY BENEFITS

### Reduce time spent on SharePoint administration

Use SharePoint enterprise manager's powerful features to quickly execute administrative tasks that would normally take hours or even days to accomplish.

### Interact with live SharePoint data

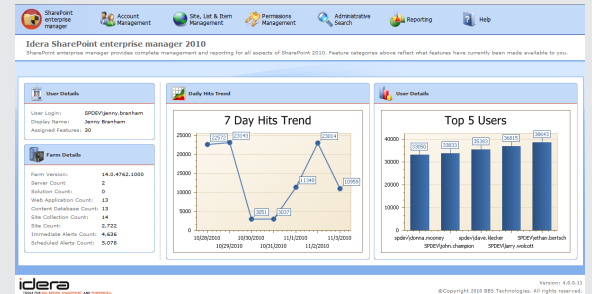

Idera SharePoint enterprise manager enables you to work with up-to-date, complete and accurate information necessary to execute your daily security, compliance, auditing, and SharePoint management needs.

### Maintain policy and compliance standards

Maintain security standards and governance compliance with real-time enterprise level reports, easy administration, and complete visibility into SharePoint environments.

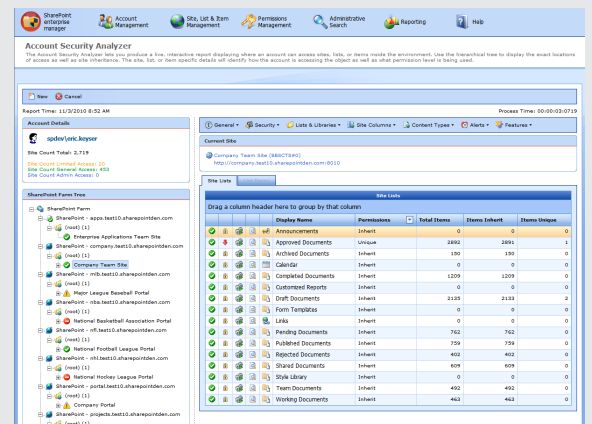

### Farm-wide visibility and administration

SharePoint enterprise manager provides a farm-wide approach to administration, reporting and security management.

## Easy to Use Interface

Idera SharePoint enterprise manager provides the solution to effectively executing daily SharePoint administrative tasks. The easy-to-use web interface presents a task-oriented ribbon menu for quick access to the many features.

## Complete Security and Permissions Management

Idera SharePoint enterprise manager's powerful features provide real time views and management of all permissions and security points in a SharePoint environment. Take total control of security in an environment from the account, site, list, item, and permission perspective.

## SYSTEM REQUIREMENTS

### Basic install

- Windows SharePoint Services (WSS) 3.0, Microsoft Office SharePoint Server (MOSS) 2007, SharePoint foundation 2010, SharePoint server 2010
- Microsoft .NET 3.5 or later
- Authentication: Windows authentication
- Repository: SQL Server 2000 SP4, SQL Server 2005 SP1 or SP2 or SQL Server 2008

### Administrative privileges required

- Installation: Installer must have SharePoint farm administration rights.
- Idera SharePoint enterprise manager Administrator: Administrative permissions to SharePoint SharePoint enterprise manager application are applied through application interface, no server rights required
- User: Minimum read access to the SharePoint site collection that Idera SharePoint enterprise manager is managing
- Feature Delegation: All features within SharePoint enterprise manager application are available for specific delegation to selected individuals at each site collection level.

## Full permissions management and auditing

Idera SharePoint enterprise manager untangles the many different ways in which users can be granted access in SharePoint. Using audit capabilities for web application policies, site collection administration rights, SharePoint Groups, and direct permissions, SharePoint enterprise manager gives administrators a unique ability to identify who has been assigned what permission level within the farm.

## Safely delegate features

Idera SharePoint enterprise manager helps accommodate all levels of management by safely delegating access to its many features. Granular security administration enables you to dictate who can use the SharePoint enterprise manager's administrative powers and on which web applications or site collections.

## TECHNICAL FEATURES

### High Performance and Accessibility:

- **Real-Time reporting**—SharePoint enterprise manager is a complete web-based solution that does not use any discovery crawling or agents to present the information collected in its robust reports.
- **Enterprise-class Scalability**—Idera's SharePoint enterprise manager uses the underlying framework and resources already built into the SharePoint system to administer and manage small to very large SharePoint enterprises. The sophisticated, non-intrusive product architecture provides unprecedented scalability.
- **Feature Delegation**—Safely and selectively delegate SharePoint enterprise manager's administrative powers to empower other managers and lessen your daily administrative burden.

### Complete Environment Management and Reporting

- **Account Management & Reporting**—Instantly understand who has access to what and how access was granted using the most comprehensive view of account and SharePoint object access available.
- **Site, List, & Item Management & Reporting**—Quickly discover and manage permission and security delegation for SharePoint sites, lists, libraries and items. Accurately manage SharePoint inheritance, permission levels, and alerts.

- **Permissions Management & Reporting**—Ensures permissions are assigned properly and security standards are applied in SharePoint. Take advantage of the unique permissions replication feature which will guarantee site, list and item levels have the proper permissions defined.
- **Environment Management & Reporting**—Farm-wide administrative and reporting features enable you to take complete and proactive control of a SharePoint environment. Produce powerful reports focused on account activity, usage, storage growth, and security.
- **Administrative Search**—Quickly locate lists, sites, documents, users, groups and more with advanced keyword and criteria-based administrative searches.
- **User Management**—Manage the gap between Active Directory profiles and SharePoint profiles. Discover and maintain domain names, email addresses and other profile specifications.

Idera is headquartered in Houston, TX with offices in London and Melbourne.
