

## As a SQL Server Administrator:

- Are you plagued by SQL Server performance problems?
- Are you losing valuable time researching and resolving problems?
- Are you tired of writing custom SQL server scripts to help diagnose your SQL Server problems?
- Are you tired of "financing" high priced SQL server performance assistance?

## What if you had a tool that could?

- Do the time consuming research for you and find problems before they impact your business
- Provide you with a list of recommendations to resolve the problem
- Allow you to focus on more database administration & design activities
- Diagnose SQL Server problems without having to write your own scripts that are time consuming
- Give you the ability to address your SQL Server problems without incurring a high cost?
- Use a tool that could be a trainer for your novice to mid-level DBA, and advisor to your senior DBA, instructing them on the rules of thumb for improving SQL Server performance

## Solution Delivered!

SQL doctor is a tool that is going to revolutionize the SQL Server market! SQL doctor provides a step-by-step wizard questionnaire to help you to focus on the appropriate areas of concern. It will retrieve all of the related information, analyze the results, pinpoint potential problems, and provide ranked recommendations that help to guide you to resolving any issue you may encounter on your servers. SQL doctor provides the right "cure" for what ails your SQL Server.

### SQL Doctor provides guidance in the following areas:

- Wait Stats
- Query Optimizations
- Blocking Processes and Deadlocks
- Index Optimization
- Memory
- Open Transactions
- System Page Files
- Server Configuration
- Database Configuration
- Disk
- Long Running Jobs
- Network
- Security Settings
- Virtual Log Files

SQL doctor gives you the ability to diagnose issues before they become problems as well as troubleshooting for existing problems that adversely affect your business. It gives you a 24x7 "in-house" resource that improves DBA productivity and reduces the need for external assistance. Whether you are a novice or expert on SQL Server performance, SQL doctor makes your day-to-day tasks easier.
