

# Small Business, Professional Services, Canada, 25 to 49 SQL Server Databases

## Introduction

This case study of NMG is based on a September 2019 survey of IDERA customers by TechValidate, a 3rd-party research service.

“For SQL Comparison Toolset, we like best that we can create batch command line jobs and schedule the comparisons.”

“We used SQL Comparison Toolset extensively when our VPN connection between offices was too slow to allow users at remote to access our head office in a usable way. We ran synchronizations at noon and after-hours which enabled the remote office to function. ”

“For SQL Comparison Toolset, the top benefits are

1. ensuring schema is identical at all locations,
2. data error resolution (synchronize production with developer local database),
3. mitigating issues over slow VPN lines,
4. automation of database synchronizations, and
5. rolling out schema changes to multiple servers. ”

## Challenges

The business challenges that led the profiled company to evaluate and ultimately select SQL Comparison Toolset:

- They manage 25 to 49 databases.

## Use Case

The key features and functionalities of SQL Comparison Toolset that the surveyed company uses:

- They use their SQL Comparison Toolset in the following environment:
  - On-premises on physical machines
  - Remotely on physical machines
- They use their SQL Comparison Toolset for:
  - Microsoft SQL Server

## Results

The surveyed company achieved the following results with SQL Comparison Toolset:

- The following are the most important features of SQL Comparison Toolset:
  - Compare schemas
  - Compare data
  - Synchronize data
  - Command-line interface
- SQL Comparison Toolset has helped their team by:
  - Upgrading and downgrading databases between different database versions and editions
  - Moving between different database environments (such as testing, development, production, and archive)
  - Verifying successful database migration and replication
- SQL Comparison Toolset has helped their organization in the following ways:
  - Speed up comparisons with robust comparison engine
  - Run extensive synchronization scripts with script execution engine
