DISCOVER WHY IDERA IS THE BEST SQL SERVER PERFORMANCE MONITORING TOOL

Do not just manage without AlwaysOn Availability Groups monitoring as you will with Redgate. There are many essential capabilities DBAs require that you can only get with IDERA SQL Diagnostic Manager.

Basic monitoring capabilities are provided by most solutions, but with IDERA you get much more. IDERA SQL Diagnostic Manager has support for mirroring, replication and cluster monitoring, tempdb monitoring, and virtual server monitoring for VMware and Hyper-V built-in and at no additional charge.

IDERA is the only solution that utilizes predictive alerts that analyze recent trends to provide early insight into potential problems before they even happen. IDERA is also the only solution that includes a Microsoft System Center Operations Manager (SCOM) plug-in and a PowerShell scripting snap-in... And we cannot forget to mention the 22 completely free SQL Server tools (with more coming), making it the best value on the market today.

Download a free, fully functional 14-day trial of IDERA SQL Diagnostic Manager right now and discover for yourself how it can make your life simpler, save your company time and money, and help make you a rock star DBA in your organization.
