DISCOVER WHY IDERA IS THE BEST SQL BACKUP SOFTWARE

Comprehensive backup and restore of mission critical data is essential to keeping your business running flawlessly. IDERA SQL Safe Backup provides unrivaled tools that work faster and safer with minimal system impact for a few SQL servers or hundreds.

Unlike Redgate, IDERA creates a central activity repository for all your backup and restore events and automatically optimizes data compression for either lowest size or best system performance. IDERA is also the only solution with Instant Restore, a patented pending technology that virtually eliminates application downtime by bringing your database online immediately when doing a restore.

IDERA SQL Safe goes far beyond the basic capabilities in Microsoft SQL Server by providing a central management console to monitor backup and restore operations in real-time, real-time notifications of events, and pre-configured reports to easily review operations for all your SQL servers. Backup and restore is an essential requirement for any organization. IDERA SQL Safe Backup is the SQL backup and restore expert with simple to use tools that enable comprehensive backup and restore strategies.

The screenshot displays the IDERA SQL Safe web console interface. The top navigation bar includes 'HOME', 'POLICIES', 'OPERATION HISTORY', 'INSTANCES', 'DATABASES', 'SQL SAFE AGENTS', 'VIRTUAL DATABASE', and 'ADMINISTRATION'. The user is logged in as 'konoha/administrator'. The main content area is divided into several sections:

- Alerts:** A section titled 'YOU HAVE 23 ALERTS' with 'Export' and 'Hide alerts' buttons. It lists four alerts:
 - LEVEL 2:** 5 databases never backed up. Click show details for more information.
 - LEVEL 2:** Last restore operation for database Northwind were cancelled by user. Last restore for database Northwind were cancelled by user.
 - LEVEL 3:** Last restore operation for 2 databases succeeded. Click show details for more information.
 - LEVEL 3:** Last backup operation for 15 databases succeeded. Click show details for more information.
- TOP DATABASES BY SIZE (MB):** A horizontal bar chart showing database sizes. ContosoRetail is the largest, followed by ContosoRetail..., ContosoRetail..., AdventureWo..., and Northwind.
- LONGEST RUNNING BACKUPS BY DATABASE (MINUTES):** A horizontal bar chart showing backup durations. ContosoRetail has the longest running backup, followed by ContosoRetail..., AdventureWo..., model, and msdb.
- My Environment:** A summary table of environment metrics:

Up	3
Down	0
CRITICAL	2
My Environment	
Managed Instances	3
Not-contacted Instances	0
Not-contacted Backup Agents	0
Databases	21
Databases with failed backup	0
Databases with failed restore	0
Backup Policies	1
Restore Policies	0
Log Shipping Policies	0
- Status Details:** A summary table of status metrics:

Policies OK	1
Policies Not OK	0
Operations Successful	15
Operations Failed	0
- Disk Space Savings:** A summary table of disk space savings:

Today:	772 MB	51 %
This Month:	1944 MB	48 %
This Year:	1944 MB	48 %
Total:	1944 MB	48 %
ROI:		1.95

At the bottom of the console, there are buttons for 'Add instance', 'Create policy', 'Backup', and 'Restore'.
